

LTB-12 Rackmount Platform

READY FOR INDUSTRY 4.0

PART OF THE
EXFO | FTB ecosystem

The LTB-12 is a powerful, scalable, 12-slot rackmount platform designed for advanced lab and manufacturing applications.

KEY FEATURES AND BENEFITS

Dedicated to optical modules: Specifically designed to meet optical applications' most demanding requirements

Flexible and scalable: Compact 4U solution with high-level module density for in-rack or tabletop applications

Hot swappable: Intelligent module with hot-swap capability, enabling a quick transition from platform to platform, or from rackmount platform to portable platform without powering down

Industrial-grade computer design: Simple, easy-to-use design powered by a quad-core processor with the Microsoft operating system

Out-of-band management: Optimal remote access for maintenance or initial setup using the Intel® Active Management Technology (Intel® AMT)

Connectivity: USB 3.0, LAN and AMT port for maximum connectivity options

Increased performance and data reliability: RAID 1 mirroring for redundancy and data protection

Automation: Power and flexibility to run automation software and protocol scripts without an external personal computer

Multi-user sharing: Efficient utilization of test resources and minimization of capital expenditures (CAPEX)

EXFO'S LTB-12 PLATFORM

The LTB-12 first-in-class platform is a versatile solution addressing numerous optical measurement applications. Whether in the design lab or during the manufacturing process, the LTB-12 provides users with added versatility and power for today's complex optical systems.

DO MORE!

The Windows 10 operating system allows for a wide choice of third-party applications and supports an extensive range of USB devices.

- › Start faster and multitask
- › Use the Office suite
- › Connect to printers, cameras, keyboards, mice, and more

OPTICAL TEST MODULES

HIGH-PERFORMANCE POWER METER

FTBx-1750

- › Fast, accurate and flexible power measurements in a platform-based solution
- › Remote measurement head for high-power readings

VARIABLE ATTENUATOR

FTBx-3500

- › Ideal for transceiver testing and system verification in demanding 24/7 production environments
- › Power monitoring and BER testing

OPTICAL SWITCHES

FTBx-9150/9160

- › Provide highly accurate and repeatable fiber-to-fiber switching
- › MEMs-based design or opto-mechanical models available
- › From 1x2 up to 1x32 configurations

OPTICAL SPECTRUM ANALYZERS

FTBx-5245/FTBx-5255

Delivers a full range of spectral analysis capabilities for testing lasers, transmitter optical subassemblies (TOSAs), transmitters or full optical systems

FTBx-5243-HWA

High wavelength accuracy optical spectrum analyzer for DWDM, CWDM and DWDM over CWDM networks

UTILITY MODULE

FTBx-9600

- › The utility module can integrate couplers and splitters into the LTB-12 platform
- › 1x2 up to 1x8 couplers with various ratios

LIGHT SOURCES

FTBx-2150

Single or multiwavelength, multimode LED diodes and singlemode DFB lasers for insertion loss and optical return loss testing

FTBx-2250

Broadband light source, covering all bands required for telecommunication applications and PON testing

FTBx-2850

μ TLA continuous wave (CW) tunable laser with a high-power output, narrow linewidth and high-resolution tunability for coherent/OFDM transmission and WDM network emulation

OTDR MODULES

FTBx-720C

Ideally designed OTDR for everyday field testing in any access network. With an iOLM application for both singlemode and multimode testing, it's the most automated and intelligent troubleshooting tool for FTTA, LAN and data centers

FTBx-730C

Seamlessly characterize splitters in PON FTTx and MDU applications

FTBx-735C

High-resolution OTDR designed for metro network testing and splitter characterization in PON FTTx applications

FTBx-750C

High dynamic range combined with high resolution for highly accurate fiber characterization

FIBER CONNECTOR INSPECTION AND CERTIFICATION—THE ESSENTIAL FIRST STEP

Taking the time to properly inspect a fiber-optic cable can prevent a slew of problems down the line—saving you time, money and headaches.

FIP-430B | The first fully automated fiber inspection probe for the field

Housing a unique automatic focus adjustment system, the FIP-430B automates each operation in the connector endface inspection sequence, transforming this critical process into one quick and easy step, which can be performed by technicians of all skill levels.

SOFTWARE TEST TOOLS

These platform-based software testing tools enhance the value of the LTB-12 platform, providing additional monitoring and inspection testing capabilities.

Software applications—ConnectorMax2

Providing lightning-fast results in the first step of fiber-link testing, ConnectorMax2 is a powerful platform-based, automated inspection application; it delivers quick pass/fail assessment of connector end faces and is specifically designed to save both time and money in the field and in the lab.

ConnectorMax2

Intel® Active Management Technology (Intel® AMT)

Remotely manage the platform (out-of-band management) without being dependent on the operating system or the state of the unit. The AMT Web-based application simplifies the out-of-the-box experience and, as an open-source solution, allows programmable remote troubleshooting recovery with extended capabilities and increased effectiveness.

a. Model FIP-430B only.

b. Data sourced from EXFO's case study, with calculation based on typical analysis time.

ADAPTED FOR DEDICATED APPLICATIONS. DEDICATED TO HELPING YOU ADAPT.

Thanks to its small format, ultra-powerful processing and highly intuitive interface, the LTB-12 is optimized to enable lab users to carry out dedicated optical and photonic integrated circuit (PIC) test applications simply and efficiently.

SPECIFICATIONS^a

Mainframe	Quad-core Intel processor/16 GB RAM/Windows 10	
Interfaces	› RJ45 LAN 10/100/1000 Mbit/s ports (2) › USB 3.0 ports (6)	› HDMI and VGA video ports › Headset and microphone ports
Storage	128 GB SSD	
Power supply	AC input: 100 V – 240 V _~ ; 50/60 Hz; 10 – 4.2 A	

GENERAL SPECIFICATIONS

Size (H x W x D) ^b	200 mm x 459 mm x 435 mm (7 7/8 in x 18 1/8 in x 17 1/8 in)
Weight	17.3 Kg (38 lb)
Temperature	
Operating	0 °C to 40 °C (32 °F to 104 °F)
Storage	-40 °C to 70 °C (-40 °F to 158 °F)
Relative humidity	0 % to 80 % non-condensing

ACCESSORIES

GP-130	GPIB cable (6 feet/2 meters)	GP-2259	Benchtop feet pads
GP-2016	RJ45 LAN cable (10 feet)	GP-2296	19-inch rackmount brackets (kit of 2)
GP-2256	FTBx module slot blank cover	GP-3109	23-inch rackmount tablet
GP-2258	USB to GPIB adapter		

LASER SAFETY

a. All specifications valid at room temperature.

b. Size only includes feet and not rackmount bracket. Rackmount configuration will fit inside 4U, 19-inch bay.
